Informatics Engineering student at Politeknik Negeri Jakarta specializing in full-stack web development, machine learning, and data automation. Experienced in building responsive applications (Laravel, React, MySQL), optimizing Python ML models, and automating data pipelines using Google Apps Script. Proven track record of deploying real-world solution. A collaborative problem-solver passionate about data-driven software engineering.

Education History

SMA NEGERI 54 Jakarta - East Jakarta, DKI Jakarta, Indonesia <i>Vocational High School in Software Engineering</i>	Aug 2020 – Aug 2023
Politeknik Negeri Jakarta - Depok, West Java, Indonesia <i>Sarjana terapan (Diploma IV), Teknik Informatika</i>	Aug 2023 - Present
CCIT FTUI (University of Indonesia) - Depok, West Java, Indonesia <i>Associate Degree in Software Engineering</i>	Aug 2023 – Nov 2025

Work Experiences

Data Entry & Frontend Developers – Kemang, South Jakarta, DKI Jakarta, Indonesia PT CANARD MONEY INDONESIA	Dec 2025 – Feb 2026
- Developed and maintained responsive and user-friendly web interfaces based on project requirements - Assisted in implementing UI designs into functional web pages using modern front-end technologies - Performed data entry, validation, and data management to ensure accuracy and consistency - Organized and updated company data in a structured database system - Collaborated with team members to support system development and operational tasks	

Project & Event Experience

Frontend Developer & Data Engineer – SleepWell 2.0– Jakarta State Polytechnic Developed a Next.js, Tailwind, and Supabase web app to visualize sleep study data and display AI reports. Processed EDF files using MNE and Python to transform raw ECG, EEG SpO2, Resp signals into statistical CSV datasets for machine learning models.	Mar 2026 – June 2026
Full-Stack Developer – Seas Voyage – PT Canard Money Indonesia Developed a luxury liveaboard booking web application using Next.js, Tailwind CSS, and PostgreSQL, building custom API routes to query boat specifications and match cabin availability in real-time. The application functions similarly to lodging booking platforms like Airbnb but focuses on premium marine tourism, yacht chartering, and cabin bookings in remote destinations.	Jan 2026 – Feb 2026
Full Stack Developer – Blue Voyage – PT Canard Money Indonesia Developed a luxury liveaboard booking web application using Next.js, Tailwind CSS, and PostgreSQL. Integrated dynamic search filters, a real-time cabin availability matching system, and interactive animations using Framer Motion with multi-language.	Dec 2025 – Jan 2026
Full-Stack Developer – UPGREENIUS – Jakarta State Polytechnic Developed a hybrid LMS web application using Laravel, Tailwind CSS, and Alpine.js to support multi-role course management and class scheduling. Integrated Midtrans payment gateway for automated transactions and implemented automated PDF certificate generation using Dompdf upon course completion.	Aug 2025 – Dec 2025

Full-Stack & Image Processing – SOTOSOP.IN – Jakarta State Polytechnic

Mei 2025 – Jun 2025

Developed a web-based image restoration system using Django, OpenCV, and Pillow. Implemented digital image processing algorithms, including Fast Non-Local Means denoising, iterative Laplacian sharpening, and Lanczos upscaling, integrated with AJAX for real-time processing previews.

Full-Stack Developer – Readiculous - CCIT FTUI

Mei 2025 – Jun 2025

Developed an online book discovery and review web application using HTML5, Bootstrap 5, and Firebase. Integrated dynamic search filters using the Open Library API, a real-time user review and rating system, and a persistent bookmark cataloging system.

UI/UX Designer – FoodEase – Jakarta State Polytechnic- Jakarta State Polytechnic

Oct 2024 – Dec 2024

Designed the UI/UX using Figma and developed a system that tracks healthy eating habits, including calorie and protein estimation. The application functions similarly to food delivery platforms like GrabFood but focuses on diet-conscious meals and nutritional information

Frontend Developer – Grocery Store Website - CCIT FTUI

Jun 2024 – Jun 2024

Developed an online grocery website with full CRUD functionality using HTML, CSS, and JavaScript, showcasing both client-side and server-side integration

Skills

Technical Skills :

React.js,Vue, Laravel, HTML, CSS, JavaScript, Java, PHP, Python, Firebase, Figma, Git, MySQL, Database Design, Machine Learning

Tools & Software:

Figma (UI/UX Design), Firebase (Backend & Auth), GitHub (Version Control), Postman (API Testing), XAMPP, VSCode, Android Studio, XAMPP, NetBeans

Soft Skills:

Adaptable, responsible, critical thinking, problem-solving, team collaboration, detail-oriented, Time Management, Analytical Thinking

Languages:

Indonesian – Native
English – Intermediate
